

Gusti Rais

Canberra, Australia

gusti.fatu@gmail.com | +61 424 381 718 | www.gustirais.com | www.linkedin.com/in/gustirais

Final-year Advanced Computing student specializing in machine learning and data science to bridge the gap between technical complexity and strategic decision-making. Proficient in R and Python across the full data science lifecycle from data modelling and cleansing through to interactive BI reporting. Proven track record of designing automated analytics and user-centric dashboards that transform raw data into high-impact, actionable insights for diverse stakeholders.

EDUCATION

Bachelor of Advanced Computing (Hons.)

Jul 2024 - Jun 2026 (Expected)

Australian National University, Canberra, Australia

- *Relevant Coursework:* Software Engineering Project, Statistical Machine Learning, Computer Vision, Computer Networks, Document Analysis, Algorithms
 - **Software Engineering Capstone:** Served as **Project Manager**, leading Agile sprints with Jira and Confluence, managing team workflows, and delivering project milestones on schedule.

Bachelor of Science (B.S.) - Computer Science

Aug 2022 - Jun 2026 (Expected)

University of Indonesia, Depok, Indonesia

AWARDS

- Recipient of the ANU Residential Scholarship
- Recipient of the ANU Chancellor International Scholarship
- Finalist of GEMASTIK Data Mining Competition

PROFESSIONAL EXPERIENCE

Data Scientist Intern

March 2026 – Present

Australian Medical Council, Canberra, Australia

- Performed comprehensive data modeling, cleansing, and transformation across multiple raw datasets to ensure high-quality inputs for scheduling systems.
- Developed and optimised scheduling algorithms in R and Python, applying statistical modelling to improve examiner allocation accuracy and assessment throughput, demonstrating ownership of an analytical solution.
- Applied Many-Facet Rasch Measurement (MFRM) to model examiner and candidate effects in high-stakes medical assessments, producing quantified bias estimates that directly informed assessment panel decisions.
- Designed and deployed a Python/SQL microservices pipeline ensuring data integrity and privacy compliance across sensitive assessment datasets, enabling reliable downstream analytics and reporting.

Data Scientist Intern

December 2025 – March 2026

Altimedia Solutions, Jakarta, Indonesia

- Performed comprehensive data modeling, cleansing, and transformation across multiple raw manufacturing datasets to ensure high-quality inputs for predictive systems.
- Designed and trained a machine learning model (Python, scikit-learn) on historical operational data to automate workforce scheduling reducing manual allocation effort and improving assignment consistency.
- Led stakeholder discovery sessions with PT Mattel Indonesia, translating ambiguous business questions into analytical requirements, demonstrating the ability to bridge technical and non-technical communication.
- Engineered a predictive analytics pipeline to forecast operator performance metrics, delivering interactive roadmap visualisations that supported operational planning and senior stakeholder reporting.
- Architected a microservices-based backend for data retrieval, storage, and cleaning, utilizing Python and SQL to build a seamless delivery system for analytics and reporting.

Fullstack Developer

August 2025 – April 2026

Pookie Platforms, Canberra, Australia

- Architected and deployed full-stack job matching platform infrastructure, orchestrating seamless CI/CD pipelines for both frontend and backend systems serving multiple concurrent users.
- Integrated advanced AI capabilities into the platform, including natural language processing for resume parsing and job description analysis, enhancing matching precision and user experience.

- Collaborated effectively with cross-functional stakeholders and aligning development priorities with business objectives and user needs.

Software Engineering Intern
Ooredoo Group, Doha, Qatar

November 2024 – February 2025

- Designed and deployed a Generative AI solution (GraphRAG + LangChain) to automate policy document retrieval and verification.
- Engineered a custom finance tracker and visualization system in R, performing data modeling and integration across multiple sources to streamline departmental financial reporting.
- Built interactive HR dashboards in R to visualise workforce KPIs, enabling senior leadership to monitor performance trends and make evidence-based workforce decisions.
- Collaborated in a cross-functional team to build automated data pipelines and reporting tools, ensuring data integrity and usability for both technical and business stakeholders.

TECHNICAL PROJECTS

Python Developer and Project Manager
Time Space, Canberra, Australia

March 2025 – October 2025

- Led and coordinated a team of 7 developers across sprint cycles, conducting daily standups, managing technical dependencies, and mentoring team members on code quality and delivery standards. Served as primary stakeholder liaison with Griffith University research staff.
- Designed project timelines and conducted comprehensive risk assessments for feature implementations, proactively identifying technical dependencies and resource constraints to keep deliverables on schedule
- Engineered Python-based computer vision pipeline for automated facial recognition and object detection, evaluating and optimizing multiple deep learning models (YOLO, RetinaNet, MTCNN).
- Managed stakeholder communications with Griffith University research team, facilitating regular requirement gathering sessions and progress updates.
- Established documentation standards and code quality practices across the development team.

ORGANIZATIONAL EXPERIENCE

Cofounder, Vice President
ANU Data Science Community, Canberra, Australia

December 2024 – November 2025

- Established organizational mission and vision while implementing financial management systems and bookkeeping processes to ensure sustainable operations.
- Co-founded and led the ANU Data Science Community, designing and delivering member training programs and forging partnerships with industry organisations including Accenture and Trellis Data.
- Cultivated strategic partnerships with leading Canberra organizations including Accenture, Aristotle, and Trellis Data, connecting members with industry experts for mentorship and professional development.

TECHNICAL SKILLS

Languages & Frameworks ● Python) ● JavaScript / TypeScript (React) ● R ● Dart (Flutter) ● C / C++	● Rust, Golang Web & Frontend Development ● React, TypeScript, HTML/CSS, Responsive Design ● RESTful APIs, GraphQL	Machine Learning & AI ● Deep Learning Frameworks (PyTorch, TensorFlow) ● Natural Language Processing, Computer Vision ● Data Analysis & Visualization
